EDUCATION

University of Plymouth

Bachelor of Science (Hons) in Computer Science

Plymouth, UK

Sept 2021 - July 2024

EXPERIENCE

Independent Web Developer

July 2024 - Present

Devon, United Kingdom

- Developed personal web based projects using ReactJS and TypeScript since graduation as proof of competency.

WordPress Developer Intern

Feb - April 2023

Falcon Digital

Newton Abbot, UK

- Developed and maintained WordPress websites for local businesses, enhancing online presence and user engagement.
- Collaborated with clients to gather requirements and provide customized website solutions.
- Implemented SEO best practices and responsive design to optimize site performance.

PERSONAL PROJECTS

AudioStats (Spotify Statistics Dashboard) | *Technologies: TypeScript, ReactJS, Zustand, Git, Vite*

- Frontend web application where users can view data/graph insights based on their Spotify listening history.
- Implemented Zustand to utilize global state management for the app, and to avoid prop drilling.
- Integrated OAuth 2.0 (PKCE) to securely authenticate and fetch user data.
- App only shows mock data to public users, despite still being fully functional, due to Spotify's new API limitations.

Orbit Productivity Tracker | *Technologies: Typescript, React, LocalStorage, Vite, Git, Figma*

- Built a feature-rich productivity tracker with drag-and-drop reordering, multi-board support, dynamic routing and Local-storage persistence.
- Optimized performance for fast load times and mobile responsiveness, ensuring accessibility across all devices.
- Deployed publicly on Vercel with an active user base. Continuously iterating with UI/UX improvements.

Developer Portfolio (Personal Website) | *Technologies: TypeScript, React, Vite, Git, Figma*

- Designed and built a modern, visually engaging portfolio website to showcase front-end development skills and projects.
- Refactored the site with TypeScript, React, and Vite to improve performance, maintainability, and modular code structure.
- Implemented smooth and interactive UI components with dynamic content loading to enhance user experience. Hosted via vercel with continuous enhancements.

Earth Sim | *C++, OpenGL, GLSL*

- Designed and implemented realistic Earth and Moon models, complete with rotational dynamics and orbital motion in a fully 3D environment.
- Used OpenGL and GLSL for rendering, with ASSIMP for model loading and GLM for movement and animation of the scene. Programmed custom camera controls for exploration of the simulation.

TECHNICAL SKILLS

Core Stack: JavaScript, TypeScript, HTML, CSS, C++, MongoDB

Frameworks & Libraries: React, Node.js, Express.js, Mantine UI, React-DnD, WebGL, WordPress

Tools and Platforms: Git, GitHub, Vite, Vercel, VS Code, Visual Studio, Figma

Core Competencies: Front-End Development, Full-Stack Development, UI/UX Design, REST API Integration, Responsive Design, SEO Optimization, Authentication (Bcrypt), Deployment (Vercel)
